

## Production Sites in Japan

In addition to our four Japanese plants, which specialize in high quality – high efficiency production – our global manufacturing is led by other sites with their own unique technologies, offering technical research and development, verification testing, and more. Our system offers support for the varied needs of our customers across the globe.

### Saitama Plant

Manufacturing of auto body components  
2909-7 Shirakusadai, Fukaya-shi, Saitama 369-1106, Japan
